

WELBECK
SECURE

Cloud Access and Integration

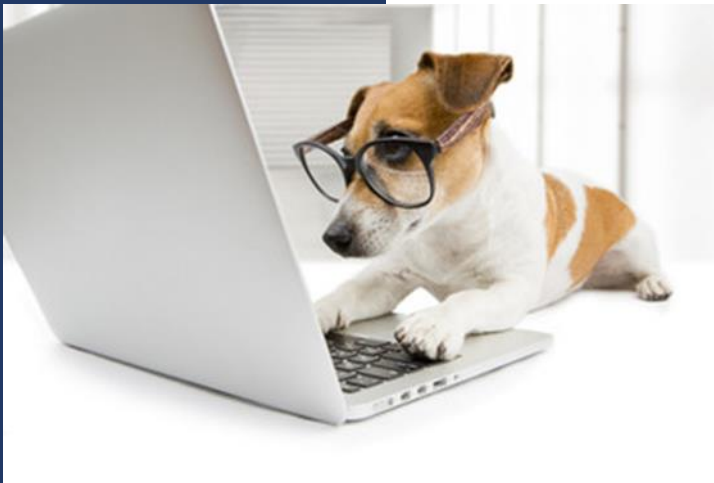

Welbeck uniquely enables cloud providers and customers to connect securely and reliably to cloud resources over internet and cellular – and to integrate cloud, mobile and on-prem resources at Layer 2 without paying for dedicated circuits or configuring Layer 3 routed VPNs. Its like the World's Longest Ethernet Cable™.

Cloud customers integrate resources on prem and in the cloud over internet or cellular - via virtual or physical Welbeck appliances.

Welbeck's secure LAN-to-LAN bridging technology integrates all network elements

Welbeck is preconfigured so that anyone can set it up without on-site IT support.

Access, Monitor and Manage at Layer 2

Welbeck gives you full LAN access to monitor and manage over internet and cellular – no messy IPsec VPN or RDP.

Built-in failover redundancy.

Its like MPLS without the cost and headache of leased lines.

Sample Use Cases

- Managed Services
- Cloud storage and back-up
- Data center redundancy
- Multit-site integration
- Private and hybrid cloud
- MS Azure and AWS.
